

CURRICULUM VITAE

Kim Rødkjær

Resume:

I am a skilled and experienced international orientated business manager, I lived abroad for several years and build a strong track record developing and managing businesses within the ICT, Automotive and as a project contractor for the UN and governments, running high scale digital projects in developing countries' worldwide. In parallel, I have had an exiting motorsports career as a semi-professional racecar driver as well as being the founder of the leading touring car racing series in Denmark.

I see my combined technical and commercial skills and capability to practice cultural and social sensitive diplomacy as my primary personal strengths. And that my thorough and competitive mindset and confidence in my skills and awareness of my weaknesses is the foundation to my success. I experienced that that paying attention to details and providing excellent training to local staff and turning them into the real specialists, inevitably enhance the long term results and the overall perception.

I make an effort to keeping an open mind and prefer getting out of the office, meeting people, asking questions and experimenting. I am getting my energy and inspiration from interacting and engaging with people at all levels.

Sincerely
Kim Roedkjaer
